Some properties define an era. And then there are those which, because of their location, are simply impossible to replicate.

Situated on the frontline of Marina Cabo Roig, where the Mediterranean takes centre stage, is one of the properties with the greatest potential on the entire Costa Blanca. An extraordinary opportunity to complete a luxury villa in a setting where properties of this kind are virtually impossible to find.

Set on a spectacular 1,417 m² plot, the property offers the opportunity to complete a fully customised villa in one of the most exclusive locations on the Spanish coastline.

Its true value lies not only in its dimensions, but also in a setting that is now almost impossible to find. Waking up every morning by the sea, enjoying privileged views throughout the year and living next to Marina Cabo Roig is a privilege reserved for very few properties.

The plot provides the perfect setting to create a landmark residence where architecture, design and location come together to form a truly exceptional home. A project conceived for those who are not simply looking for another property, but for a unique residence capable of retaining its exclusivity over time.

Cabo Roig has established itself as one of the most prestigious residential areas on the Costa Blanca, renowned for its elegant villas, marina, excellent dining options, golf courses and a lifestyle combining privacy, tranquillity and all essential amenities just a few minutes away.

There are many luxury villas. Locations like this are exceptionally rare.

The images and layouts shown are conceptual visualisations created using artificial intelligence. They do not constitute an approved architectural project and do not represent the property's current condition.
